About

I'm a software engineer. I have a strong interest in Reactjs and I can also work with Remix or Nextjs. I have knowledge of Vue too. I like working with responsive design so that the web app can be multiple-devices compatible. I've got 2 years of experience working as a Frontend Developer. I'm always willing to learn new things and in the next 2-3 years, I want to reach the level middle in this field.

Education

08/2018 – 12/2022

- University of Science, VNU-HCM
Information Technology, Information System

Experience

● SENS VN

Frontend Developer | 03/2022 – current

Role description: Frontend developer, take responsibility for making UI components, pages with responsive designs, maintain websites, study new technologies to apply to projects, write api if needed. Communicate with QC team and Design team to improve websites quality and UI/UX.

Tech stacks: ReactJs, NextJs, Remix, Javascript, Typescript, SASS, AntD, TailwindCss, Styled Component, Prisma, Drizzle ORM, tRPC.

Projects

● Kitchko project

Frontend Developer | 03/2022 – 09/2022

Detail: In this project, I worked as a Frontend Developer. I had to make some landing pages for the website (responsive included) then building a backoffice website for management.

Tech stacks: NextJs, ReactJs, SASS, Antd (for frontend).

Website: <https://kitchko.com/>

● GovInsider project

Frontend Developer | 09/2022 – current

Detail: This is an article website for Singapore Government. I made the website for reading articles, events and some landing pages (responsive included). I also made a backoffice (CMS) website. In this project, I got a chance to access Backend role. I wrote some easy and medium apis.

Tech stacks: Remix, ReactJs, Stitches, RadixUI, Prisma.

Website: <https://govinsider.asia/intl-en>

● WeWe

Frontend Developer | 07/2023

Detail: This is a landing page built for Black Pink concert event. After the event ended, it's going to be used for selling NFT.

Tech stacks: Nextjs, ReactJs, Tailwind.

Website: <https://wewe.exchange/>

● SZNONE

Frontend Developer | 03/2023 – current

Detail: This is an NFT website. I joined in building the landing page for the website and the CMS to manage content in that landing page.

Tech stacks: Nextjs, ReactJs, Tailwind, RadixUI, tRPC.

Website: <https://szn.sens-vn.com/>

- **Fleamint**

Frontend Developer | 06/2023 - current

Detail: This is an NFT website. Beside selling NFT, it also uses third-party Getstream.io to run features like Twitter (create post, repost, react, ...)

Tech stacks: Nextjs, ReactJs, Tailwind, RadixUI, tRPC.

Website: <https://fleamint.com/>

- **Woobleu CMS**

Frontend Developer | 05/2023 - current

Detail: Made a backoffice (CMS) to manage content in a landing page. I'm responsible for making UI and api for that UI too. API build in tRPC and Prisma.

Tech stacks: Nextjs, ReactJs, Tailwind, RadixUI, Prisma, tRPC.

Website: <https://woobleu.sens-vn.com/> (The landing page)
